Commanding Officer, SMC

## BIBLIOGRAPHY AND INDEX OF RESEARCH IN HUMAN AND ANIMAL VIGILANCE 1961—1965

The early literature on vigilance research has recently been brought together in a bibliography\* listing some 200 titles and covering most studies up to 1961. The present bibliography, listing some 170-odd new titles including papers on the rhesus monkey and cat, covers the reference period from 1961 to mid-1965 and brings this vigilance bibliography up to that date. Reference sources are the **Psychological Abstracts** and the articles themselves. Most citations are verified.

Articles are listed alphabetically by author. Most entries represent journal articles, the publications of military laboratories, and doctoral dissertations. Titles of papers appearing in more than one version or edition are given in their various forms. Abstracts not followed by publication are omitted.

Verifying numbers for articles cited in **Psychological Abstracts**, some "AD"-document\*\* numbers, and the addresses of document-issuing agencies are appended in brackets to facilitate the procurement of reprints. A rudimentary index prepared from article titles, abstracting descriptors and, in some cases, the papers themselves appear at the end of the bibliography.

The authors gratefully acknowledge the library facilities extended to them by Smith College, Connecticut College, and Yale University, during the preparation of this report.

13 ABSTRACT  Early literature on vigilance research was brought together by James J. McGrath* in 1961. The present bibliography, listing 176 new titles, including papers on the rhesus monkey and the cat, covers the reference period from 1961 to mid-1965 and brings this vigilance bibliography up to that date. Reference sources are the <u>Psychological Abstracts</u> and the articles themselves. A rudimentary index prepared from article titles, abstracting descriptors, and in some cases, the papers themselves appears at the end of the bibliography.  *McGrath, James J. (1961) A bibliography of research on human vigilance. Human Factors Suppl. Note to Tech. Rep. #1, 15pp. (Human Factors Research, Inc., 1112 Crenshaw Blvd., Los Angeles 19, Calif.).

**INSTRUCTIONS**

**1. ORIGINATING ACTIVITY** Enter the name and address of the contractor, subcontractor, grantee, Department of Defense activity or other organization (corporate author) issuing the report.

**2a. REPORT SECURITY CLASSIFICATION** Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.

**2b. GROUP** Automatic downgrading is specified in DoD Directive 5200.10 and Armed Forces Industrial Manual. Enter the group number. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.

**3. REPORT TITLE** Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.

**4. DESCRIPTIVE NOTES.** If appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is covered.

**5. AUTHOR(S)** Enter the name(s) of author(s) as shown on or in the report. Enter last name, first name, middle initial. If military, show rank and branch of service. The name of the principal author is an absolute minimum requirement.

**6. REPORT DATE.** Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.

**7a. TOTAL NUMBER OF PAGES** The total page count should follow normal pagination procedures, i.e., enter the number of pages containing information.

**7b. NUMBER OF REFERENCES.** Enter the total number of references cited in the report.

**8a. CONTRACT OR GRANT NUMBER** If appropriate, enter the applicable number of the contract or grant under which the report was written.

**8b, 8c, & 8d. PROJECT NUMBER** Enter the appropriate military department identification, such as project number, subproject number, system numbers, task number, etc.

**9a. ORIGINATOR'S REPORT NUMBER(S)** Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.

**9b. OTHER REPORT NUMBER(S)** If the report has been assigned any other report numbers (either by the originator or by the sponsor), also enter this number(s).

**10. AVAILABILITY/LIMITATION NOTICES.** Enter any limitations on further dissemination of the report, other than those imposed by security classification, using standard statements such as

(1) "Qualified requesters may obtain copies of this report from DDC."

(2) "Foreign announcement and dissemination of this report by DDC is not authorized."

(3) "U S Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through \_\_\_\_\_."

(4) "U S military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through \_\_\_\_\_."

(5) "All distribution of this report is controlled. Qualified DDC users shall request through \_\_\_\_\_."

If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.

**11. SUPPLEMENTARY NOTES** Use for additional explanatory notes.

**12. SPONSORING MILITARY ACTIVITY** Enter the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.

**13. ABSTRACT** Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.

It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words. \*

**14. KEY WORDS** Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entries for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be followed by an indication of technical context. The assignment of links, roles, and weights is optional.
